

REACH / RoHS

The word REACH is an acronym of English words and stands for "Registration, Evaluation, Authorisation of Chemicals".

The REACH regulation is June 1, 2007, and was updated in subsequent years. The main objective of REACH is to improve protection of human health and the environment. For this purpose, a central index is created with data on chemical substances marketed in Europe.

As a company we are doing in a regular contact with our suppliers and, after examining the materials used in our products, it was found that according to the current state of information, the company auris-GmbH is not affected by the REACH regulation.

We have thereby informed us about the relationships with the REACH regulation and will inform you of any changes.

Our frequency control products are RoHS compliant according to the European Regulation RoHS 2011/65/EU of June 8, 2011 (excl. annex point 7)

If you need a REACH-regulation, you can order it per email or phone.

For further questions on this topic, we are happy to help you.
