## Statement on the restriction of the use of certain hazardous substances ( RoHS ) / 01.06.2005

Dear Sirs,

We herewith confirm, that our components are completely free of cadmium, mercury, chrome (VI)-compounds, polybrombiphenyl (PBB) und Polybromdiphenylether (PBDE).

As far as these prohibited substances are concerned, all our products correspond completely to the current RoHS-guide lines (2002/95/EC).

Our products contain mereley lead compounds at the soldering point.  
In this application it is a matter of high-temperature-soldering, which is excepted from the ban at the moment.  
All pins of our products are pure tinned galvanized since 2002. Therefore we guarantee, that no pollution will arise at any further soldering process, while using our lead compound.

Consequently all our products are corresponding to the above mentioned EU-guideline and can be used leadfree in all other applications.

In case of any further questions or for more information, please feel free to contact us again.

Best regards  
HAHN-Elektrobau GmbH & Co. KG

  
i.A. Ralph Gerling  
(RoHS-commissioner)
